DETAILED ACTION

This Office action is in response to applicant's amendment filed on 20 September 2005.

Allowable Subject Matter

1. Claims 1-10, 27-42 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - Claims 1-10, 27-32 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method that includes the steps of forming a first layer that includes an oxygen-rich semiconductor layer over a substrate, epitaxially growing a second layer that includes a semiconductor layer directly on the first layer, converting the first layer to an oxide layer, and forming a transistor with a channel that is formed only in the second layer;
 - Claims 33-39 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method that includes

the steps of forming a first layer that includes an oxygen-rich semiconductor layer over a substrate, epitaxially growing a second layer that includes a semiconductor layer directly on the first layer, converting the first layer to an oxide layer, and forming a gate dielectric on the second layer, wherein there is no semiconductor layer between the gate dielectric layer and the second layer; and

- Claims 40-42 are allowed because the prior art of record does not teach or suggest, in combination with the other claim limitations, a method that includes the steps of forming a first layer that includes an oxygen-rich semiconductor layer over a substrate and selectively between first and second isolation regions, selectively epitaxially growing a second layer that includes a semiconductor layer directly on the first layer, and converting the first layer to an oxide layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
